

Adding Blood Transfusion/Components Band in IVIEW & PowerNote

1. Open a patient chart
2. Click on **IVIEW & PowerNote**
3. Click **View** from the menu items at the top of the screen
4. Click **Layout ►** from the drop down list
5. Click on **Navigator Bands...**

6. Click on **blood transfusion comp** from the **Available Document Types** window
7. Click the right-facing arrow to move the band to the **Current Document Types** window
8. Compare the **Current Document Types** window with the bands in the patient chart and reposition bands as needed

*Note: NEVER remove ednote. You must leave ednote in **the Current Document Types** window in order to write a PowerNote. Sometimes band 'jump' to the **Available Document Type** window and you can select them and move them back*

9. Highlight the name of the band and use the up/down arrows to position the band in the order that you would like it, then click **OK**

Note: To change the order of another band you must unselect the highlighted band and then select the next band you want to move.

10. You will receive a message to close and reopen the application. You actually only need to close and reopen the chart
