

Charting Continuous IV Fluid Infusions in Med Admin– (Not Titratable Drips)

 Begin Bag	← <u>ALWAYS Begin Bag when a new bag is hung</u>
 Site	← <u>Changing Site here does not send info to IVIEW</u>
 Infuse	← <u>DO NOT choose Infuse at HMC</u>
 Bolus	← <u>Chart Bolus here</u>
 Rate	← <u>Chart Rate Changes here</u>

Begin Bag – Each and every bag, not just the first bag

- Remember, when a new bag is hung, chart **Begin Bag** in **Med Admin**

*Charting **Begin Bag** in Med Admin does NOT send a message to Pharmacy to send a new bag to the unit. Use the **Med Request** feature on Med Admin*

Fluid Bolus - Given from an existing, maintenance infusion (NS, LR...)

- Med Admin** tab, select Continuous Infusions, select administration box for the existing infusion
- Select **Bolus**; enter the Bolus Volume (yellow), review info, Apply, sign
- Bolus Volume** will show in Intake and Output Band immediately

Fluid Bolus – Given from a new, separate bag of fluid (NS,LR...)

- Click the **Orders** tab
- Type ***bolus** in the Find: field and select the correct solution; Finish the order entry process
- Chart from **Med Admin**, select **Unscheduled**, select the task (administration) box for the bolus, review info, **Apply**, sign
- Review Intake and Output band. The bolus volume may need to be **Confirmed** before it is entered into totals 

Rate Change on Continuous Infusions (Not Titratable Drips)

- Med Admin**, select Continuous Infusions, select task (administration) box for the existing infusion, select **Rate**, and enter rate change, review info, **Apply**, sign
