

Charting Epidurals

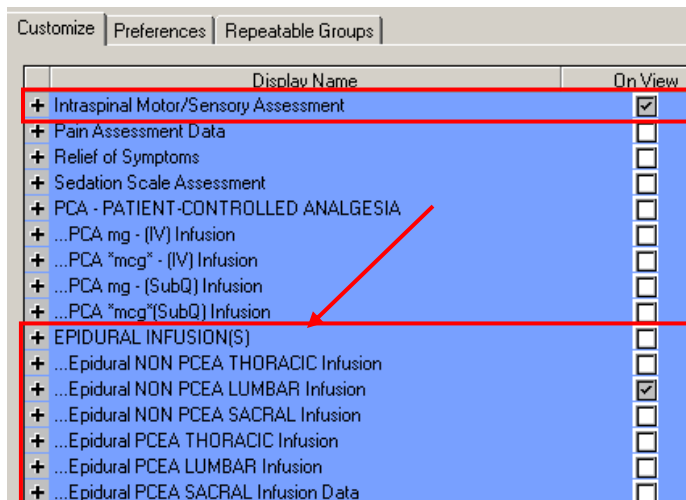

Epidurals have a medication infusion, so you must **Begin Bag** in **Med Admin** and enter the volumes in the **Intake and Output band**.

Epidural charting is located in the Neuro/Pain Detailed band in IVIEW. There are **four** components of charting epidurals on the flowsheet:

- Pain/Assessment Data (open on Frequent Assessment band)
- Motor/Sensory Assessment (must be added)
- Epidural Infusion details (must be added)
- Assessment of the epidural catheter and site (must be added)

Neuro/Pain Detailed Band

1. Click the **Customize View** icon
2. Select **Intraspinal Motor/Sensory Assessment**
3. Select the type of **Epidural Infusion** – based on location (HMC uses **NON-PCEA**)

4. Select **Line Assessment Data** – based on the location of the epidural - Thoracic/Lumbar/Sacral Infusion Cath/Site Asmt Data
5. Click **OK**
