

## Charting Allergies in the Triage PowerForm

If allergies have been charted during any visit at HMC, UWMC, or SCCA they will display in the Allergy field.

### Adding Allergies

1. Right click anywhere in the white field, select Add New and click the desired option.

2. Select the **Catalog** tab if not already selected.
3. Click on the + sign next the appropriate folder.
4. To add the allergen, double click the name of the substance. It appears in the Substance field on the right.

*Click **Search** tab to look for a drug not in the catalog. Enter name of Allergen and hit Enter on keyboard. Double click to select.*

### Charting Allergy Details

1. Place cursor in the box **3. Reaction Symptoms**.
2. Select the **Catalog** tab on the right side of the window.
3. Click on + sign next to the folder **Common Allergy Reactions**.

4. Double Click on the allergy reaction(s) that should be listed.
5. Add information in box **4. Allergy Details** or **5. Comment** if appropriate.
6. Click **OK** to sign.

**Note:** To modify or remove an existing allergy, Open the Allergies window from the chart or the Triage form. Right Click over the allergy and select "Modify" or "Cancel".
