

Charting Patient Allergies - HMC

If allergies are entered during a clinic visit, at any previous inpatient admits or at any encounter at HMC, UWMC, or SCCA they will be displayed in the patient chart.

Charting Allergies from the Demographic Bar ****Allergies**** link within the Patient Chart

Location: H-7E; **** Allergies ****
Inpatient [9/20/2007 8:28 PM - <No - Discharge date>]

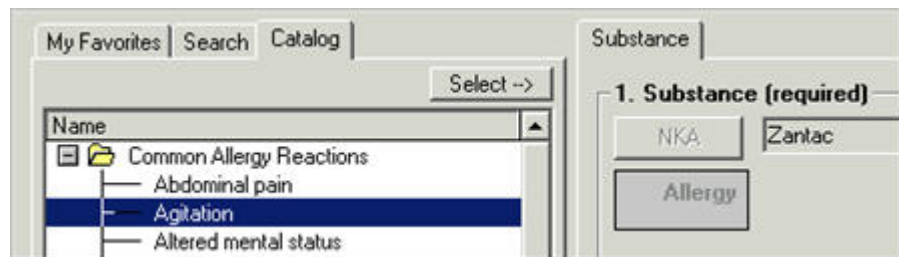

1. Open the patient chart
2. Click on the ****Allergies**** link in the demographic bar
3. Right click in any white area
4. Select **Add New...▶**
5. Select **Drug Allergy**

Note: If the allergy being charted is a drug allergy choose "Drug Allergy". Other options are: "Drug Side Effect" and "Other".

6. Be sure **Search** tab is selected (left side of the Add Allergy/Adverse Effect Box)
7. Under the Search tab, type the medication name in the white box
8. Click the **Search** button
9. Double Click on the medication to add it to the **Substance** field (right side of the Add Allergy/Adverse Effect Box)

Charting Allergy Details

1. Place cursor in the box: **Reaction Symptoms**
2. Select the **Catalog** tab

3. Click on + sign next to folder "Common Allergy Reactions"
4. Double Click on the allergy reaction that should be listed
5. Add information in box: **Allergy Details** or **Comment** if appropriate
6. Click **OK** to sign

Note: To modify an existing allergy, Open the ****Allergies**** link in the demographic bar. Right Click over the allergy and select "Modify".
